github.com/Talibabtou

Frontend developer focused on Web3 and fintech products, with hands-on experience on prediction markets, trading dashboards and blockchain interfaces. 42 Lyon Common Core graduate, previously trained in high-end craftsmanship at Hermès, bringing precision, product judgment and strong quality standards. Growing toward full-stack engineering, product ownership and technical architecture.

Target roles: frontend, product engineer or full-stack oriented positions in Web3, fintech, banking, SaaS and product-led startups.

FOCUS

Web3, fintech, trading and product interfaces

DIRECTION

Full-stack growth, product ownership, architecture

STRENGTH

Clarity, APIs, dashboards, maintainable UI

TECHNICAL SKILLS

Frontend TypeScript, JavaScript, React, Next.js, component systems, responsive UI, UX refinement	Data & APIs REST/API integration, synchronization flows, Node.js, Python, WebSockets, dashboards
Blockchain Solana ecosystem, wallet-aware UX, prediction markets, smart-contract integration, Rust learning	Engineering Git, Docker, C, C++, algorithms, data structures, maintainable code, performance awareness

SOFTWARE EXPERIENCE

Jupiter - Consultant, Frontend Developer - jup.ag	Dec 2025 - Mar 2026
- Contributed to the Jupiter Prediction Market interface within the Solana ecosystem. - Improved product flows, screen clarity and interaction consistency across user-facing features. - Integrated frontend features with attention to maintainability, performance and production constraints. - Worked in a fast-moving product context involving market data, wallet-aware interactions and release quality.	
Adrena - Internship, Contributeur open-source - adrena.xyz	2025
- Delivered UI improvements, reusable components and product screens for a DeFi trading product. - Connected frontend behavior to backend data through API-driven product features. - Improved dashboards, leaderboard experiences and data-heavy interface elements.	
Versus - Founder & Developer - github.com/Versusrip/versus	2024 - 2025
- Designed and developed a prediction/betting product concept with a Solana-oriented architecture. - Built frontend flows, product logic and smart-contract interactions using TypeScript, React, Python and Rust. - Owned product thinking across UX, community, roadmap and go-to-market strategy.	
Magicake / Doge Capital - Founder, Board Member - magicake.io / thedogecapital.com	2021 - 2024
- Built product, community and strategy experience around NFTs, crypto-native users and online communities. - Handled communication, community operations, business development and strategic decisions.	

SELECTED PROJECTS

ft_transcendence - 42 Capstone

- Built a full-stack real-time web game with a custom React-like frontend architecture.
- Implemented single-player, multiplayer and tournament flows with WebSockets.
- Stack: TypeScript, Node.js, WebSockets, frontend architecture, real-time game logic and UX.

42 Common Core

- Completed an intensive peer-to-peer software engineering curriculum focused on autonomy and rigor.
- Covered algorithms, data structures, C/C++, system programming, networking, graphics and Docker.

Versus

- Prediction market / betting product with Solana-oriented architecture and product design.
- Stack: TypeScript, React, Python, Rust/Solana.

EDUCATION

42 Lyon - Common Core completed - Software Engineering	Nov 2023 - Jul 2025
GRETA Lyon - CAP Leatherworker	2018
ISCO Grenoble - Bachelor-level Technical Building Management	2016
Lycée Champollion - Scientific Baccalaureate	2012

PREVIOUS CAREER

Hermès - Leatherwork Artisan	2017 - 2021
- Worked in high-end manufacturing with strong expectations for precision, repeatability and finish quality. - Assembled over one hundred Kelly bags; supported tooling and team workflows.	
Tali - Independent Leatherwork Consultant	2022
- Joined a creative studio in Barcelona; built operational product lists and made made-to-measure luxury goods.	
EDA - Alternating Student, Technical Office	2014 - 2016
- Produced estimates, manufacturing and installation drawings, safety reports and customer communication.	

SECTOR POSITIONING

Web3	Wallet-aware UX, prediction markets, DeFi dashboards, crypto-native communities, Solana ecosystem.
Fintech / Banking	Data-heavy interfaces, reliability, clean implementation, product clarity, API-connected dashboards and user workflows.
Product Teams	Founder mindset, product ownership, frontend quality, business understanding and ability to translate user needs into usable interfaces.

KEYWORD COVERAGE

Blockchain frontend, Web3, fintech, banking, TypeScript, JavaScript, React, Next.js, Node.js, Python, APIs, WebSockets, Solana, Rust, C, C++, Docker, Git, UI/UX, dashboards, leaderboards, prediction markets, product ownership, clean code, performance.

LANGUAGES

French native - English fluent

PRODUCT & SOFT SKILLS

Product sense, ownership, communication, leadership, autonomy, adaptability, business insight, community building
